Executive Summary

The integrated quality and performance report monitors the clinical quality, national performance standards for the CCGs on a monthly basis.

This report highlights the areas of concerns and achievement of standards on a month on month basis. It highlights key actions being taken to improve or maintain current performance. The executive summary on page 3 of the report categorises the current month's quality and performance indicators into two sections; achieving and areas of challenging performance.

Further detail about each indicator can be found in subsequent pages of the paper.

Recommendation

That the Governing Body: Note the level of compliance with quality and performance targets and support the actions being taken to improve performance where necessary.
